

Microsoft® Exchange Server 2007 Architecture Planning Service

HP Express Services

HP Express Services are designed as fast to deploy, packaged offerings to quickly and cost-effectively help your organisation achieve new efficiencies and competitive advantage.

Mission-critical email communications

Today's heavy reliance on email means most businesses have to balance rich, efficient access to email against email security threats and the need for cost-efficient enterprise-wide deployment.

Microsoft® Exchange Server 2007 has been designed specifically to meet these challenges with an advanced messaging system that addresses protection and collaborative employee access anywhere, anytime.

Exchange Server 2007

Our Express Services offering for Exchange Server 2007 is an Architecture Planning Service which develops a high level architecture for your organisation's new messaging environment.

Working in line with your business and technical objectives, HP's experienced Exchange Server 2007 Consultants will provide expert guidance, deliver you an implementation roadmap, and define the topology and hardware requirements for your Exchange Server 2007 messaging deployment.

The right fit

The HP Express Services offering for Exchange Server 2007 is best suited to your organisation if you are about to start an Exchange Server 2007 implementation program. But it's equally suited to you if you have a messaging environment based on another platform, and are looking to change.

The additional business benefits of this HP service include helping you reduce the cost and complexity of your current messaging environment, while increasing collaboration and productivity levels across your organisation with a future-proof Unified Communications platform.

Service feature highlights

A trained and experienced Exchange Server 2007 specialist from HP will work with your organisation and will:

- Send you a workshop agenda and questionnaire three days before engagement.
- Manage your Exchange Server 2007 planning workshop.

- Work with you to identify your Exchange Server 2007 business requirements.
- Highlight a Unified Communications roadmap.
- Develop a high-level Exchange Server 2007 Architecture document.
- Generate a report indicating the hardware and software requirements for the solution.
